

DDS

PROFESSIONAL MULTI-FORMAT DJ MEDIA PLAYER

TOTAL AUDIO MEDIA PERFORMANCE. Perfect for mobile DJs who want to locate their music instantly and playback from a variety of media sources, DDS applies familiar CD-player style controls to a wide range of media for today... and tomorrow. DDS is a rack-mount multi-media control deck for use with hard drives, CD/DVD drives, thumb drives, iPods, and card readers. You can quickly and easily access any track in your library or any connected device because DDS gives you fast track access with text search using the click knob or the included keyboard.

DDS has the transport controls you're used to, and connects you to a whole new world of media. It has the feel and intuitive operation of a CD player, the high-tech power of a high-definition color screen and USB connectivity, and the promise that no matter where new media goes, you're covered.

FEATURES

- Traditional dual-deck performance in rack-mount configuration
